COURSE OVERVIEW

A specialized course that prepares participants to manage and oversee safety during steel erection.

Steel erection combines work at height, heavy lifts and structures that are unstable until complete. Aligned with OSHA 29 CFR 1926 Subpart R, the course covers regulatory scope and project preparation, hoisting and rigging, structural assembly and stability, and fall protection and perimeter safety.

Participants also cover equipment, tools and work platforms, column anchorage, decking and shear stud installation, worker training and qualification, and inspection and site safety management. Graduates are equipped to anticipate hazards and protect both workers and structural integrity.
