COURSE OVERVIEW

A specialized course that prepares participants to oversee scaffold assembly, use and inspection with confidence and authority.

Scaffolds are essential in construction and industrial work but present serious risks if not erected and maintained correctly. The course covers the regulatory foundations of scaffold safety, scaffold design, load capacity and structural integrity, planning for erection and safe erection procedures.

Participants also cover scaffold inspection and maintenance, training, supervision and competency requirements, specialized scaffolding systems and their hazards, and safe dismantling and program review. Graduates are equipped to ensure stability, prevent falls and protect workers at every height.
