COURSE OVERVIEW

An advanced course that prepares participants to lead safety across upstream, midstream and downstream oil and gas operations.

The oil and gas sector combines complex processes, extreme conditions and high-risk environments. The course covers developing and implementing a safety management system, contractor safety and multi-employer worksite management, and process safety and mechanical integrity.

Participants also cover occupational health and industrial hygiene controls, high-hazard task management, emergency preparedness and incident response, and auditing, compliance monitoring and continuous improvement. Graduates are equipped to design and manage safety programs for demanding operations.
