COURSE OVERVIEW

An essential course that protects workers from some of the most common and severe risks in industrial environments.

Machinery incidents, often caused by inadequate guarding or unsafe practices, lead to life-altering injuries and costly downtime. The course covers the core principles of machine safeguarding, approaches to ensuring machine safety, and safeguarding techniques and safety devices.

Participants also cover additional safeguarding methods, the construction of machine guards, and safe maintenance and repair of machinery. Graduates are equipped to recognize unguarded hazards and apply the right safeguards proactively.
