COURSE OVERVIEW

A comprehensive course for professionals who plan, erect, supervise or work on scaffolds.

Scaffolding is one of the highest-risk components of construction and maintenance work. The course covers the regulatory and structural foundations of scaffold safety, design and load principles, controls for erection, alteration and dismantling, and inspection and condition verification.

Participants also cover fall protection and safe access, platform and working deck requirements, site conditions and environmental hazards, and training and competency. Graduates are equipped to prevent falls, structural failures and unsafe practices on scaffolds.

CORE COMPETENCIES
