COURSE OVERVIEW

An essential course for professionals who erect, modify and dismantle scaffolding systems.

Scaffold erection demands precision, technical knowledge and strict adherence to safety protocols. The course covers the regulatory framework and scaffold classification, pre-erection planning and site preparation, erection techniques and structural requirements, and access, egress and platform safety.

Participants also cover fall protection for erectors, stability and load management, inspection and competent person duties, training and competency, and safe disassembly. Graduates are equipped to build scaffolds that stay stable and protect everyone who uses them.
