COURSE OVERVIEW

A specialized course for professionals who manage operations where dust accumulation can cause fires or explosions.

Manufacturing, food processing, woodworking, metalworking and chemical operations can generate dust that ignites with devastating force. The course covers combustible dust fundamentals, hazard identification and dust testing, process hazard control and engineering design, and electrical and fire protection.

Participants also cover housekeeping and cleaning programs, work practice controls, PPE and respiratory protection, emergency planning and egress, and training and documentation. Graduates are equipped to recognize and control dust explosion risk.

FINAL EXAMINATION

1

Score 70% or higher

Complete a timed, open-reference online examination taken through the Student Dashboard, drawn from a structured question bank.

2

Retake if needed

If you do not pass first time, further attempts are available. A short review period applies between attempts so you can revisit the course material.

3

Earn your certificate

A passing score confirms your eligibility for the Certificate of Completion. Once passed, the exam cannot be retaken to improve the score.
