COURSE OVERVIEW

A course that prepares participants for the unique, high-risk environments of the oil and gas sector.

Oil and gas operations combine heavy equipment, flammable materials and harsh conditions. The course covers industry operations and the regulatory framework, physical and mechanical hazards, fire, explosion and flammable material hazards, and chemical and health hazards.

Participants also cover confined spaces and special operations, environmental and process safety hazards, emergency preparedness, and training and safety culture. Graduates are equipped to recognize oil and gas hazards and work safely within established controls.
