COURSE OVERVIEW

A professional program that prepares individuals to develop, deliver and support occupational safety and health training in general industry.

The program combines instructional capability with hazard analysis competence. Participants learn adult learning principles, training design and delivery techniques, then apply hazard identification, risk assessment, job hazard analysis and ergonomics to build training content that reflects actual workplace risk.

Aligned with the training and hazard communication principles of OSHA 29 CFR 1910, the program emphasizes clear communication and systematic training approaches. Graduates are equipped to plan, design and conduct effective safety training within their organization's training program.
