COURSE OVERVIEW

A specialized certification that prepares safety practitioners, supervisors and managers for fire prevention and fire risk control across industrial, commercial and high-risk workplaces.

The program emphasizes preventing fire and explosion incidents through systematic hazard identification, control of ignition sources and effective emergency preparedness. You will learn to develop and implement fire prevention plans, oversee fire safety responsibilities and manage the workplace conditions that contribute to fire risk, from egress and exit routes to combustible dust and hot work.

The curriculum also covers hazardous materials awareness, hazardous energy control, safe materials handling and transportation-related fire risks. Completion signifies professional competence in fire prevention and the ability to reduce fire and explosion risk, support emergency response planning and maintain compliance.
