COURSE OVERVIEW

A professional certification for the specialist who manages an organization's total hazardous materials program: classification, procurement, receipt, storage, handling, use, transport, emergency response and disposal.

The RHMP brings together the topics of individual hazmat courses into one integrated credential. You will learn to classify chemicals under GHS, DOT and NFPA 704, run a compliant hazard communication program, store and segregate materials safely, and integrate OSHA, DOT and EPA requirements into a single compliance strategy.

The program covers HAZWOPER programs at awareness, operations, technician and specialist levels, spill response, dangerous goods transport (49 CFR, IATA DGR and the IMDG Code) and RCRA hazardous waste management, including generator status. It closes with program governance: policy, training, inspections, auditing and continuous improvement.
