COURSE OVERVIEW

An advanced certification that equips safety practitioners, supervisors and managers to design, implement and oversee effective occupational health and safety management systems.

Integrating OSHA 29 CFR 1910 and 1926, ANSI Z10 and ISO 45001, the CHSM prepares learners for real-world leadership in diverse industrial environments. It emphasizes proactive risk management, compliance assurance and continuous improvement, and trains participants to analyze complex hazards, develop comprehensive safety programs, conduct regulatory audits and lead teams through effective training.

Where the CHSO certifies operational competence, the CHSM certifies the ability to lead programs. It blends regulatory expertise with managerial skill, so graduates are technically proficient and capable of strategic decisions in high-risk settings, protecting people, property and productivity.
