COURSE OVERVIEW

A certification that prepares professionals to deliver effective safety training that meets organizational and regulatory requirements.

The program focuses on how to train, not what to train. Beginning with adult learning principles and the trainer's role, you will learn to design structured programs using ADDIE, write clear learning objectives, create engaging content for diverse audiences, and meet hazard-specific training requirements.

Practical focus is placed on presentation and facilitation skills, from managing presentation anxiety to running discussions, scenarios and role-plays. You will assess competency through observation and demonstration, evaluate training with Kirkpatrick Levels 1–4, and build your professionalism as a credible safety leader.
